IT IS ALL ARBITRARY

It is all arbitrary: social distancing, contact tracing, masking in our schools!

Did you know that the new social distancing standard in our schools is now 3 feet instead of the 6 feet required last year? Why not 2 feet or 7 feet?

Did you know that the contact tracing period is a loosely defined "2 days" as opposed to the 72 hours last year? So what constitutes 2 days?

Did you know that the time period is now an unspecified 15 minutes? Is it 15 *consecutive* minutes as is the common understanding of the term? Is it 15 *cumulative* minutes as it was defined last year?

Did you know that the contact tracing is REGARDLESS of masking?

SDR administration developed a plan to promote safety and health (both mental and emotional) but which demonstrates the arbitrary nature and unproven basis of all the mitigation practices for the spread of Covid.

SDR administration expects all of us to accept the assurance that the school administration knows what is best for our children's health, education and well-being. Why should we do so blindly and unquestioningly?

Parents, students and community members, we will not do so blindly and unquestioningly. We will not relinquish the right to think critically and make decisions for ourselves!

Check out the [Hodag Preparedness Plan, 2021-2](#). Let's ask questions and expect answers from our administration. Together we can keep our school administration accountable to the constituency it serves and true to our values and wisdom.

The Truth About the FDA Approved Vaccine

With all the hype on FDA approved Vaccines, I think it is important to share that the only FDA approved vaccine is the COMIRNATY (COVID19 Vaccine, mRNA). We have been deceived. Not all COVID-19 Vaccines are created equal. I urge you to know what vaccine you and your loved ones are being offered. Currently, the Comirnaty Vaccine is not even available.

According to the FDA, the following Vaccines have been designated as EUA (Emergency Use Authorization) products: the licensed Moderna, Pfizer BioNTech, and Janssen Vaccines. By doing so, the FDA has guaranteed the vaccine a very significant liability shield, which means you are not covered if any adverse reactions happen after taking the vaccine. This is alarming!

The FDA admits these EUA Vaccines cannot be mandated, as all remain under the EUA. Buried in the fine print of the fact sheets, it states that "it is **YOUR CHOICE** [emphasis added] to receive the COVID-19 Vaccine." The Vaccine fact sheets will help arm you to avoid being forced to accept an experimental vaccine. This of course is not widely known because of the mass censorship and deception. We have the ability to fight these mandates by presenting these to anyone who tries to force vaccinations on students or employees.

PCR Tests

According to the Rhinelander School District, the School Testing Site that will be available in the Hodag Dome in the coming weeks will be utilizing PCR tests. This is a huge concern for students utilizing these tests as the PCR tests have been proven to be inaccurate, resulting in false positives. Many doctors and scientists agree that PCR tests are not to be used as diagnostic tests because of the inaccuracy in identifying an inactive virus vs a live virus. In addition, the PCR tests cannot differentiate between Covid-19 and other flus. The World Health Organization (WHO) suggests the PCR tests are merely an "aid for diagnosis." The WHO warns the medical field to "consider any result in combination with timing of sampling, specimen type, assay specifics, clinical observations, patient history, confirmed status of any contacts, and epidemiological information." Therefore, a single positive PCR test does not validate a diagnosis of COVID-19.

Unreliable testing protocols produce inaccurate test results, inevitably causing unnecessary quarantines that disrupt students from learning in schools. It is a burden on the children as well as the parents who have to take time off work to keep students home and juggle doctor appointments to get clearance for reentry back to school.

It is clear there has been a major deception regarding positive case numbers since the PCR test introduction in February 2020. So much so that the CDC has published a notice for clinical laboratories to stop using the PCR tests by the end of 2021. We can't trust the PCR Tests, so how can we trust and support any decision by the school district on past or current COVID protocols if the Health Advisory Committee and School Board are basing their faulty data on these illegitimate PCR test results? It's simple; we can't.

"Mainstream Media"

A Take Back Team member recently shared that her husband and she attended a ticketed patriot event in Central City, Kentucky, with some of the most knowledgeable and powerful patriots in the country at this time. It was amazing!!

It was not a huge event by any means, but there were several thousand in attendance as well as several thousand more watching the livestream. The local media were not happy they were not allowed in or granted an interview, so they wrote a false hit piece that got picked up and exploited by several larger national publications including Newsweek. Check out these contrasting stories at the links below. This is a prime example of why you do not want to get your news from mainstream sources!
